

2022 Manufacturing Advocacy Priorities

BAMA and the 13 other regional manufacturers associations in Florida have collectively agreed to support and collaborate on these priorities for the upcoming Session, elevating the issues that are most important to our manufacturing stakeholders across the state.

1

Support the efforts of the Florida Manufacturing & Supply Chain Caucus of the legislature.

2

Strengthen economic development initiatives. Specifically FloridaMakes, the state's Manufacturing Extension Partnership, which works to improve the productivity and technological performance of Florida's manufacturing sector.

3

Invest in Career and Technical education, apprenticeship and workforce development programs.

4

Promote initiatives that encourage use and development of local suppliers and one that contributes to developing a more robust and resilient supply chain system for the state.

5

Invest in initiatives focused on accelerating the adoption and use of Industry 4.0 technologies.
